DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because the term "provide" in line 1 should be deleted. Correction is required. See MPEP § 608.01(b).

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 21-23 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 31 of U.S. Patent No.

6,408,952. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the instant invention claim a broader invention than the US'952 claim. The US'952 patent claims a system for operating an HDD machine (having a drill string and cutter) comprising a remote unit with transceiver (locator), a user interface, and a controller (which performs various functions). The claims of the instant invention are drawn towards a much broader system that includes

a locator, a user interface, and a controller (which performs much broader functions).

Therefore, it would have been considered obvious to one of ordinary skill in the art at the time the invention was made to have claimed the broader system along with the US'952 patent in order to obtain broader coverage of the invention.

Allowable Subject Matter

4. Claims 1-20 and 40-57 are allowed.
5. Claims 24-39 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
